

## ASBESTOS MANAGEMENT PLAN

In accordance with the EPA's Asbestos Hazard Emergency Response Act (AHERA) of 1987 (40 CFR Part 763, Subpart E of the Code of Federal Regulations), School Districts are required to give annual notification stating that the Asbestos Management Plan for each Building is available for public review.

This rule requires local education agencies (LEAs) to identify friable and non-friable asbestos-containing material (ACM) in public and private elementary and secondary schools by visually inspecting school buildings for such materials, sampling such materials if they are not assumed to be ACM, and having samples analyzed by appropriate techniques referred to in this rule.

In keeping with this legislation, the Coatesville Area School District was inspected by EPA accredited inspectors and a comprehensive management plan was developed for handling asbestos containing building material in a safe and responsible manner. The last 3 Year Re-Inspection was completed in August of 2017 and the next 3 Year Re-Inspection will be completed in August 2020. Six-month periodic asbestos surveillances are performed in accordance with AHERA.

A copy of the asbestos management plan and inspection reports are currently kept in the Facilities Department. These records are available for review by appointment during normal school business hours.

Questions related to the plan should be directed to Dr. Matthew R. Flannery, Director of Operations for the Coatesville Area School District.
