

CASD joins the Hour of Code Event

February 2, 2022

- Did you know?
 - Every profession needs technology. Only a fraction of students are learning **HOW** technology works.
 - Only 51% of all high schools offer computer science.
 - More than 100 million students worldwide have already tried an Hour of Code.
- CASD is joining the event!
 - Our Hour of Code is making a statement that the Coatesville Area School District is ready to teach these foundational 21st-century skills.
- What can you do?
 - To continue bringing programming activities to your students, we want to make our Hour of Code event huge. We encourage you to speak with your children about this great opportunity. We are looking forward to sharing our students' engagement in this event on February 2, 2022:

The diversity problem starts in K-12

Only 25% of high school CS students, university CS graduates, and people employed in tech fields are female.

Women who try AP Computer Science in high school are **ten times more likely to major in it**, and black and Latinx students are **seven times more likely**.
