

Budget Newsletter – Spring 2018

During the April School Board Meeting, Directors had significant discussion on the proposed budget and the factors that have been impacting the financial positioning of the District. Those factors, though not limited to, include charter school tuition, charter school special education tuition, increasing special education costs, and pension costs. The Board of Directors also discussed the desire to ensure that there were not wide spread staffing eliminations that would increase class sizes and decrease educational programs. The current budget includes money for the teacher contract, continued improvements in technology hardware and infrastructure, money to move forward in the building project planning, money for continued purchase of new books, money for continuing after school programming, and other educational programming. We invite you to read the budget newsletter by [Clicking Here](#).
